DETAILED ACTION

Election/Restrictions

Combination/subcombination

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 53-65, 75-79, drawn to supervisory circuit to monitor battery charge with voltage comparison, classified in class 320, subclass 162.
- II. Claim 66-74, drawn to supervisory circuit to monitor battery charge with programmable resistor control, classified in class 320, subclass 103.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of each of groups I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions can each be used for their respective uses has separate utility such circuit to monitor battery charge with different comparison. See MPEP § 806.05(d).

3. Invention I and II are related as combination (invention I) and subcombination (invention II). Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particular of the subcombinations as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention II, the

combination as claimed does not required use of programable resistor . The subcombination (invention II) has separate utility such as circuit to monitor battery charge with different comparison.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Affirmation of this election must be made by applicant in replying to this Office action. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)
